**6. Regular Agenda**

**6.A. Laramie Middle School Presentation - Community Design Challenge**

Chrissy Gale, a teacher at Laramie Middle School, presented a project where her middle school students designed ideas for enhancing Laramie's community facilities, with indoor sports facilities and a teen hangout space being the most popular concepts. Michael noted that these ideas aligned closely with their new community-wide sports facilities study, which began the previous week, and expressed interest in having the students participate in the upcoming community engagement phase scheduled for January through March.

**6.B. First Street - Depot Park Project Presentation**

**[Shahidi, Planning Dept.]**

The presentation focused on the First Street Depot Park project, where Joseph Shahidi presented the findings and recommendations from the planning consultants. The project aims to improve parking, accessibility, and stormwater management in the downtown area. However, concerns were raised about the impact on trees, particularly on the north side where some trees need to be removed due to their poor condition. The revised plan includes parallel parking on the south side to preserve trees, but this results in a 5% decrease in total

parking spaces. Citizens expressed concerns about the parking situation and the importance of preserving the trees. The advisory board discussed potential solutions to extend the life of older trees, including structural pruning and supplemental watering.

**Title: Bid Award for the 2026 Street Rehabilitation Project**

**Recommended Council MOTION:**

I move to award the Bid for the 2026 Street Rehabilitation Project to Knife River Corporation in the amount of eight million twenty-three thousand six hundred sixty-nine dollars (\$8,023,669.00) plus a contingency of one million five hundred thousand dollars (\$1,500,000.00) and authorize the Mayor and City Clerk to sign.

**Administrative or Policy Goal:**

City of Laramie Wyoming Resolution 2025-92

---

**Background:**

As part of the FY 2026 supplemental budget, City Council formally committed \$14 Million from unallocated reserve to improve pavement conditions and address a backlog of maintenance within the street system. The current Pavement Condition Index (PCI) rating is 58/100 indicating streets are in “fair” condition, on average.

City staff developed the 2026 Street Rehabilitation Project list by starting with a pavement maintenance list prepared by the Street Division Manager. Engineering staff performed field verification, conducted pavement and concrete visual assessments, and evaluated ADA compliance in accordance with Department of Justice requirements.

The maintenance list was then compared to, and analyzed with, the City’s PCI model. Parameters were set to emphasize arterial and collector streets suitable for mill-and-overlay treatment, focusing on corridors with sound curb, gutter, and sidewalk conditions. Multiple model scenarios were run to identify high-impact streets while ensuring the projects could be efficiently delivered. This process refined and updated the original maintenance list to better reflect the intent of the mill-and-overlay project, using the best available data combined with staff experience and knowledge of Laramie’s streets.

On November 18, 2025, City Council approved Resolution 2025-92 creating the 2026 Street Rehabilitation Project. This resolution transferred Fourteen Million Dollars into the Fiscal Year 2026 Budget to improve pavement conditions and address a backlog of maintenance within the street system.

The 2026 Street Rehabilitation Project is described as approximately 9 lane-miles of mill-and-overlay with associated curb and gutter work, ADA ramps, and spot base repair. Bids were solicited and opened January 13, 2026. One bid was received in accordance with the City of Laramie Purchasing Policy.

- Knife River Corporation      Base Bid - \$8,023,669.00

After reviewing the bidding documents, staff recommend Knife River Corporation be awarded the Construction Contract for the FY 2026 Street Reconstruction Project. Per the Bid Form requirements, the work will be Substantially Completed by October 31, 2026, and Final Completion by December 11, 2026.

**Recommended Council MOTION:**

I move that the Laramie City Council approve Original Ordinance No. 2116, on third reading and final reading, amending Laramie Municipal Code Title 13, Division VII, Chapter 13.80, related to Surface Water Drainage, and authorize the Mayor and City Clerk to sign.

---

**Administrative or Policy Goal:**

2025 Adopted Goal – Infrastructure that is Housing-Ready & Business-Ready

*The community's success builds upon the publicly operated infrastructure that ensures human health and facilitates business and commerce; healthy infrastructure supports a thriving Laramie.*

**Action Directed** → Implement the business plan for storm water management.

---

**Background:**

In December 2024, the City established the Surface Water Management fund (LMC 13.80) following many years of study, planning, and community discussion regarding the need for a sustainable funding mechanism to maintain and improve the City’s stormwater system. The creation of the fund was the culmination of more than a decade of work that began with the 2009 West Laramie Drainage Plan and continued through multiple system assessments and engineering analyses. These studies consistently demonstrated that existing funding was inadequate to support the operation, maintenance, and capital needs of the community’s aging and undersized drainage infrastructure.

The purpose of the fund is to ensure a stable, dedicated funding source to address flooding, system reliability, and water quality concerns and to ensure the health and safety of the community.

Following the initial billing cycle, in July 2025, members of the public expressed concerns regarding the proposed rate structure, overall affordability, and perceived equity. In response, on August 5, 2025, the City Council adopted Resolution 2025-65, which suspended implementation of the business plan and established a 120-day review period. This pause was intended to allow additional time for staff and Council to re-examine rate methodologies, evaluate alternative approaches, and provide clearer communication to the community about the fund and fees for service. City Council has held three successive public work sessions held on September 9, 2025, October 14, 2025, and November 12, 2025.

On November 18, 2025, Council determined to extend the suspension of the Surface Water Management Program through June 30, 2026, with the adoption of Resolution 2025-93, thus allowing staff time to draft directed amendments for Council consideration.

Based on Council direction provided at multiple 2025 work sessions, staff have prepared an Ordinance amending LMC 13.80 including potential modification to the levels of operation and service, and adjustment of fees for the stormwater fund.

**Responsible Staff:** City Manager, Public Works Director and Administrative Services Director

**13.80.020 Imposition of surface water drainage fee.**

- A. Beginning on July 1, 2026~~5~~, **through June 30, 2026**, a monthly surface water drainage fee of one dollar and sixty-seven cents per Billing Unit is hereby imposed on every developed parcel within the city that appears in the Albany County parcel database or has a verifiable owner or management company of record in the City's Municipal Services Billing System. ~~Beginning on July 1, 2026, a monthly surface water drainage fee of one dollar and seventy-five cents per Billing Unit shall be imposed on every developed parcel within the city that appears in the Albany County parcel database.~~ Any future addition through subdivision or recombination of established real property shall be subject to the same fees. All

surface water drainage fees shall be deposited into the Surface Water Drainage Fund of the City.

**B. Parcels identified in the Albany County parcel database that are designated as placeholder parcels, including parcels associated with condominium common elements or shared ownership areas, shall not be independently billed. (Ord. No. 1859, § 1, 12-3-2024)

### **13.80.040 Surface water drainage fee calculation.**

A. Unless otherwise specified, the surface water drainage fee for each parcel shall be calculated in the following manner:

1. Determine the impervious area of the parcel in square feet.
2. Divide the impervious area of the parcel by the Billing Unit.
3. Round the resulting calculation using natural rounding to determine the number of Billing Units. Natural rounding shall be applied by increasing the number of Billing Units to the next highest whole number if the tenths digit is five or higher and decreasing the number of Billing Units to the next lowest whole number if the tenths digit is lower than five.

4. Multiply the number of whole Billing Units by the rate established in 13.80.020 to obtain the surface water drainage fee for the parcel.
- B. The surface water drainage fee for impervious area held in common ownership within a condominium development shall be calculated using the methodology in Paragraph A of Section 13.80.040. The total impervious area assigned to the common elements shall be allocated to each condominium unit parcel based on the percent ownership allocation established in the recorded condominium declaration or master deed. If no percent ownership allocation is specified in the recorded documents, the allocation shall be divided equally among all condominium unit parcels within the development. The resulting surface water drainage fee shall then be billed to each condominium unit parcel based on the total impervious area assigned to that unit through this allocation method shall be calculated using the methodology in Paragraph A of Section 13.80.040 above. The resulting surface water drainage fee will be billed to the common ownership entity, who would be responsible for any sub-billing to individual owners within the common ownership parcel.
- C. Service charges resulting from ~~increases~~ identified changes in impervious area after the implementation of the Original Ordinance shall be reviewed and assessed at a minimum quarterly.
- D. The City Manager or designee may develop specifications for the mapping of impervious area for the purpose of this division including the establishment of a uniform threshold under which a contiguous unit of impervious area is considered de minimis and not subject to mapping.

#### ~~13.80.050 Surface water drainage fee credits.~~

- ~~A.— The City Council may adopt by resolution a system of credits that provides for reductions in the surface water drainage fee in recognition of practices that reduce the cost of the surface water drainage management program. The types and amounts of credits shall be adopted through resolution by City Council.~~
- ~~B.— The City Manager or designee may develop a Credit Manual containing written policies and procedures necessary to implement the system of credits. These policies and procedures may include, but not be limited to, provisions to reduce or eliminate the amount of credit if the City Manager or designee determines through inspection that the practice is not functioning as intended. The credit shall be applied after determination of the surface water drainage fee in accordance with the Credit Manual.~~
- ~~C.— Service charge credits resulting from decreases in impervious area after the implementation of the Original Ordinance shall be reviewed at a minimum quarterly.~~

#### 13.80.060 Billing, interest, and enforcement.

- A. The surface water drainage fee shall be billed by the City using the ~~City's Utility~~ Municipal Services Billing System, following existing and established policy for the schedule and collection of charges due. The surface water drainage fee will be collected on the same schedule as other City ~~utility~~ Municipal Services Billing charges. Any portion of a surface water drainage fee that is unpaid shall be considered delinquent as defined in existing ~~Utility~~ Municipal Services Billing policy for collection of past due receipts including applied penalties, except if the unpaid surface water drainage fee is subject to an appeal in accordance with 13.80.070.

- 
- B. In addition to any penalty assessed, any cost or fee incurred by the City in conjunction with the collection of a delinquent fee shall be the responsibility of and paid by the owner of the subject parcel.
  - C. Delinquent fees shall be addressed as set forth in Wyoming State Statute.

### **13.80.070 Appeal procedures.**

- A. Any owner of a parcel who believes the provisions of this division have been applied in error may appeal in accordance with this Section, provided, however, that grounds for appeal are limited to the following:
  - 1. An error was made regarding the square footage of the impervious area attributed to the parcel.
  - 2. The property is exempt under 13.80.020.B.
  - 3. There is a mathematical error in calculating the surface water drainage fee.
  - 4. The identification of the parcel owner invoiced is in error.
  - ~~5. An approved credit was incorrectly applied.~~
- B. The parcel owner shall complete and submit to the City Engineer or designee a surface water drainage fee appeal form in a format approved by the City Engineer or designee within thirty calendar days of the charge being mailed or otherwise issued to the owner ("appeal date"). The City Engineer or designee shall review the appeal for completeness and decide within thirty calendar days. If the City Engineer or designee finds that the appeal is incomplete, the City Engineer or designee shall offer the owner thirty calendar days from the determination that the appeal is incomplete to supply the missing information. If all information requested is not provided within the thirty calendar days, the petition will be deemed to have been withdrawn.
- C. Once the appeal has been determined to be complete, the City Engineer or designee shall conduct a technical review of the alleged error and respond to the owner in writing within forty-five calendar days. The City Engineer or designee may deny the appeal or adjust the surface water drainage fee if it is found to be in error.
- D. A decision by the City Engineer or designee that is averse to the appellant may be further appealed to the City Manager or designee within thirty calendar days of the determination being mailed or otherwise issued to the owner. The City Manager or designee shall review the determination of denial made by the City Engineer or designee and either affirm, reject, or modify the determination. The City Manager or designee's determination will be provided to the owner in writing by certified or registered mail within thirty calendar days of receiving the denial appeal request.
- F. When the final appeal decision is rendered, the City's standard practices for evaluating account delinquency will apply.
- G. Service charge credits resulting from decreases in impervious area after the implementation of the Original Ordinance shall be reviewed and credited monthly.
- H. Service fee refunds shall not go back further than three years.

- B. Parcels identified in the Albany County parcel database that are designated as placeholder parcels, including parcels associated with condominium common elements or shared ownership areas, shall not be independently billed. The impervious area associated with such parcels shall be assigned to the condominium unit parcels based on the percent ownership allocation established in the recorded condominium declaration, master deed or Albany County or in alignment with the current billing format established to bill other Municipal Services fees.
- C. The maximum amount of Billing Units for Non-Residential parcels shall be one hundred twenty (120) and the maximum amount of Billing Units for residential parcels shall be eighteen (18)
- D. Notwithstanding 13.80.020., the following impervious areas shall be exempt from the imposition of the surface water drainage fee:
  - 1. Public rights-of-way; (i.e. public streets and sidewalks).
  - 2. City-owned multi-use pathways and trails that are constructed, maintained, or operated by the City for public transportation, recreation, or non-motorized travel.
  - 3. Rail and associated rail ballast.
  - 4. City zoned agricultural land.
  - 5. Airport property located within the perimeter fence of the secured airfield.

**13.80.030 Surface water drainage fund.**

The Surface Water Drainage Fund is hereby established and shall be used solely to cover the cost of the City's surface water drainage management program including related debt service. Revenues of the fund shall consist of service charges generated by the surface water drainage fee and other deposits that may be made from time to time by the City Council including, but not limited to, City general funds, federal or state grants and revenue from the sale of bonds. All interest or other income derived from surface water drainage fees shall remain or otherwise be deposited into the fund.

(Ord. No. 1859, § 1, 12-3-2024)

**13.80.040 Surface water drainage fee calculation.**

- A. Unless otherwise specified, the surface water drainage fee for each parcel shall be calculated in the following manner:
  - 1. Determine the impervious area of the parcel in square feet.
  - 2. Divide the impervious area of the parcel by the Billing Unit.
  - 3. Round the resulting calculation using natural rounding to determine the number of Billing Units. Natural rounding shall be applied by increasing the number of Billing Units to the next highest whole number if the tenths digit is five or higher and decreasing the number of Billing Units to the next lowest whole number if the tenths digit is lower than five.
  - 4. Multiply the number of whole Billing Units by the rate established in 13.80.020 to obtain the surface water drainage fee for the parcel.

- B. The surface water drainage fee for impervious area held in common ownership within a condominium development shall be calculated using the methodology in Paragraph A of Section 13.80.040. The total impervious area assigned to the common elements shall be allocated to each condominium unit parcel based on the percent ownership allocation established in the recorded condominium declaration or master deed. If no percent ownership allocation is specified in the recorded documents, the allocation shall be divided equally among all condominium unit parcels within the development. The resulting surface water drainage fee shall then be billed to each condominium unit parcel based on the total impervious area assigned to that unit through this allocation method
- C. Service charges resulting from identified changes in impervious area after the implementation of the Original Ordinance shall be reviewed and assessed at a minimum quarterly.
- D. The City Manager or designee may develop specifications for the mapping of impervious area for the purpose of this division including the establishment of a uniform threshold under which a contiguous unit of impervious area is considered de minimis and not subject to mapping.

**13.80.060 Billing, interest, and enforcement.**

- A. The surface water drainage fee shall be billed by the City using the Municipal Services Billing System, following existing and established policy for the schedule and collection of charges due. The surface water drainage fee will be collected on the same schedule as other City Municipal Services Billing charges. Any portion of a surface water drainage fee that is unpaid shall be considered delinquent as defined in existing Municipal Services Billing policy for collection of past due receipts including applied penalties, except if the unpaid surface water drainage fee is subject to an appeal in accordance with 13.80.070.
- B. In addition to any penalty assessed, any cost or fee incurred by the City in conjunction with the collection of a delinquent fee shall be the responsibility of and paid by the owner of the subject parcel.
- C. Delinquent fees shall be addressed as set forth in Wyoming State Statute.

**13.80.070 Appeal procedures.**

- A. Any owner of a parcel who believes the provisions of this division have been applied in error may appeal in accordance with this Section, provided, however, that grounds for appeal are limited to the following:
  - 1. An error was made regarding the square footage of the impervious area attributed to the parcel.
  - 2. The property is exempt under 13.80.020.B.
  - 3. There is a mathematical error in calculating the surface water drainage fee.
  - 4. The identification of the parcel owner invoiced is in error.
- B. The parcel owner shall complete and submit to the City Engineer or designee a surface water drainage fee appeal form in a format approved by the City Engineer or designee within thirty calendar days of the charge being mailed or otherwise issued to the owner ("appeal date"). The City Engineer or designee shall review the appeal for completeness and decide within thirty calendar days. If the City Engineer or designee finds that the appeal is incomplete, the

City Engineer or designee shall offer the owner thirty calendar days from the determination that the appeal is incomplete to supply the missing information. If all information requested is not provided within the thirty calendar days, the petition will be deemed to have been withdrawn.

- C. Once the appeal has been determined to be complete, the City Engineer or designee shall conduct a technical review of the alleged error and respond to the owner in writing within forty-five calendar days. The City Engineer or designee may deny the appeal or adjust the surface water drainage fee if it is found to be in error.
- D. A decision by the City Engineer or designee that is averse to the appellant may be further appealed to the City Manager or designee within thirty calendar days of the determination being mailed or otherwise issued to the owner. The City Manager or designee shall review the determination of denial made by the City Engineer or designee and either affirm, reject, or modify the determination. The City Manager or designee's determination will be provided to the owner in writing by certified or registered mail within thirty calendar days of receiving the denial appeal request.
- F. When the final appeal decision is rendered, the City's standard practices for evaluating account delinquency will apply.
- G. Service charge credits resulting from decreases in impervious area after the implementation of the Original Ordinance shall be reviewed and credited monthly.
- H. Service fee refunds shall not go back further than three years.

**Agenda Item:** Resolution  
**Title:** Resolution 2026-16, Amending the Appropriations for Fiscal Year 2025-2026 for the City of Laramie, Wyoming for the Replacement of the Ice and Event Center Chiller and Compressors

**Recommended Council MOTION:**

I move that the City Council approve Resolution 2026-16, amending the appropriations for Fiscal Year 2025-2026 in the amount of \$500,000 to fund the needed replacement of the Ice & Event Center chiller and compressors, and authorize the Mayor and City Clerk to sign.

**Administrative or Policy Goal:**

N/A

---

**Background:**

The ice-making equipment (chiller and compressors) at the Ice & Event Center were originally used at the outdoor rink at Undine Park, and it has been well used for over 25 years. However, in recent years it has required increasing levels of maintenance and repairs each year to keep it running properly. In the startup season for 2025/26, we had to replace several contactors and sensors, and we were concerned that we would be able to open for the season.

Additionally, the existing system uses R-22 refrigerant as its chemical chiller, which began being phased out in 2010, and was completely banned from production and import in the US in 2020. This means that it is very difficult and expensive to find. In 2024, we replaced 30 pounds of R-22, and this past year we needed to replace 48 pounds. It is unclear where this refrigerant is leaking from or going to. The leak is concerning, as is the dwindling ability to acquire replacement R-22. A new system will use a glycol-based refrigerant.

The requested amount for this amendment is a best estimate from several manufacturers for a replacement of the chiller and compressors, but is not based on actual quotes, as companies are reluctant to provide full quotes without financial commitment. If approved, we will need to develop a bid for the demobilization of the existing equipment, the new replacement equipment, and the installation. If additional funds are needed, we may need to ask for an additional amendment or potentially draw from unspent SPT funds.

Timing is a concern, and our goal is to get the equipment installed by the start of the next season. However, there is a possibility that the season may be delayed, and we will work with our skating community to communicate this to them.

**RESOLUTION AMENDING THE APPROPRIATIONS FOR FISCAL YEAR  
2025-2026 FOR THE CITY OF LARAMIE, WYOMING FOR THE REPLACEMENT

**WHEREAS**, the Laramie Community Ice and Event Center is a highly valued and heavily used asset of the community, serving over 60,000 users annually; and

**WHEREAS**, the equipment used to create the ice sheet is over twenty-five years old, has needed increasingly frequent repairs, and is beginning to fail; and

**WHEREAS**, failure of the ice-making equipment during the season would be catastrophic to hockey, figure skating, and the general skating community; and

**WHEREAS**, budgets may be adjusted pursuant to Wyo. Stat. 16-4-113.

**NOW THEREFORE BE IT RESOLVED BY THE CITY COUNCIL OF LARAMIE, WYOMING:**
